Boise, Idaho 83720

SUBJECT: Quarterly Source Permit Report: Conda, Idaho

Dear Mr. Groves:

Attached are the results of the ambient SO₂ monitoring program at Conda, Idaho, for the second quarter of 1985.

Weekly opacity (Method 9) observations of the fugitive dust control systems indicated no periods of excess emissions observed during this reporting period.

We are experiencing severe down time and maintenance problems with the control devices on the materials handling system. The evaluation is not yet complete but current indications are that the fabric filters will have to be replaced. You will be kept informed of developments.

Coal firing of the dryer began in July and will continue on an intermittent basis until the annual allotment of coal is consumed. We are conducting emissions testing during coal firing to refine the previously used emissions factors.

If you have any questions or comments, please contact me at your convenience.

Sincerely,

W. A. Wolleson
Environmental Engineer

UNIVERSITY OF IDAHO
Inter-Office Memorandum

Date August 12, 1985

The fluoride levels of the vegetation samples collected on June 25
are tabulated below.

Sample. Number	PPM Fluoride	
	Univ. of Idaho	Monsanto
1	19	17
2	17	12
3	16	16
4	18	15
5	21	17
9	13	9
10	12	13
11	33	24
13	22	24
16	15	
17	12	8
18	14	14
19	11	14
20	11	7
21	12	13
22	16	10
23	14	
24	25	
25	13	
26	12	
31	19	16
32	31	25
34	16	16
35	17	16
36	11	16
38	14	14
42	19	13
43	17	
44	16	

When values are missing for Monsato they are going to rerun the analysis.

Dr. A.C. Wiese
Department of Bacteriology and Biochemistry
University of Idaho
Moscow, ID 83843

Dr. Wiese:

I received your September 24 letter, with the proposed date change today. Obviously, since Monsanto and Beker Industries are financing the study, you should schedule the meeting with them and at their convenience.

I have rescheduled the conference room in the courthouse for 10:00 a.m. on November 19. There may be a meeting room at one of the plants which you could also consider. I have previous commitments that week, but am sure that Mr. Eaton or Mr. Wind would be willing to perform introductions.

Enclosed is a list of those individuals attending the 1984 meeting. Although Evan Kackley was not at the meeting, he is included on the list.

I hope that a change in your plans does not result in this date becoming inconvenient for you. However, if you need to change the meeting's date you can reschedule this conference room, if you choose to use it. Since this is a Wiese-Beker-Monsanto project, I suggest you stay in touch with them to coordinate contacts and activities to your mutual satisfaction. I will wait for verification of your plans before preparing a newsrelease.

Sincerely,

Sarah Henson
